Here's what I wish I'd known first – but what about Internet Explorer?. We've looked at the surprising It's not easy to switch browsers, but unperturbed, I launched myself into the world of Steve Jobs – iTunes, iWork, iCloud, and, significantly – Safari.. Advertisement Choosing your Internet browser is not a decision to be taken lightly, yet it is an issue that very few users give careful consideration to.

Thinking about using Safari on your Mac, but worried you might lose features and bookmarks? Here's a quick guide to comfortably moving to Apple's web browser, without missing out.. , unwieldy, and insecure, and these days most people who buy a new computer make a headlong dash to Google Chrome's download page without further thought.. It's an ironic fact that while Mac and Windows users will argue over many aspects of their operating systems, they both typically agree that the two default browsers are useless.
